Engineering

—

InterSpark-Frontend Developer

Project Description

This project is a professional Netflix homepage UI clone built using HTML, CSS, and JavaScript.

The goal was to recreate a modern streaming platform interface with responsive design, attractive movie sections, and smooth user experience.

Documentation

Project Objective:

- Why you selected Netflix
- What you wanted to learn

Example:

“I selected Netflix because its UI is modern, visually engaging, and widely recognized.

This project helped me improve frontend development skills including layout design, responsiveness, animations, and professional styling.”

Technologies Used:

Technology

- ❖ HTML5
- ❖ CSS3
- ❖ JavaScript
- ❖ Flexbox/Grid

Purpose

- ❖ Structure
- ❖ Styling & Layout
- ❖ Interactivity
- ❖ Responsive Design

UI Design Explanation:

Navbar

- Fixed navigation bar
- Transparent gradient effect
- Responsive menu

Hero Section

- Fullscreen cinematic background
- Gradient overlay for readability
- Call-to-action buttons

Movie Sections

- Horizontal scrolling cards
- Hover zoom animation
- Responsive movie thumbnails

Footer

- Professional finishing section

Challenges Faced

“One challenge was maintaining responsiveness while keeping the Netflix-like layout visually balanced.

Another challenge was implementing smooth hover scaling effects without breaking alignment.”

What You Learned

“This project improved my understanding of:

- ❖ CSS Flexbox
- ❖ Responsive layouts
- ❖ UI design principles
- ❖ Hover animations
- ❖ Professional website structuring”

Special Features:

- ❖ Smooth hover animations
- ❖ Dark Netflix theme
- ❖ Mobile responsive design
- ❖ Professional typography
- ❖ Movie background effects
- ❖ Scroll-based navbar effect

Responsive Design

“The website automatically adapts to mobile, tablet, and desktop screens using media queries.”

Netflix Homepage UI Clone Using HTML, CSS & JavaScript

←-----Source code End-----
-----→

←-----OUTPUT----- ---→

The output of this project is a responsive and visually attractive Netflix homepage UI clone developed using HTML, CSS, and JavaScript.

The webpage successfully recreates the modern streaming-platform appearance with a professional navigation bar, cinematic hero banner, movie sections, hover animations, and responsive design.

Conclusion:

The Netflix UI Clone project was successfully developed using HTML and CSS. This project helped in understanding modern web design concepts, responsive layouts, flexbox, positioning, and user interface development.

By recreating the Netflix homepage, valuable hands-on experience was gained in building visually appealing and user-friendly web pages. The project enhanced front-end development skills and provided practical knowledge of creating professional website interfaces.
